Bemidji-Cass Lake Chapter Members:

The Minnesota Department of Natural Resources – Bemidji Area Fisheries would like to thank your chapter for the generous donation of a new PIT tag reader to be used for Muskellunge management purposes. The new reader was received on April 21 and immediately put to use during spawn take operations on Little Wolf Lake.

As you may know, advances in technology required us to upgrade our PIT tag reader so that it would remain compatible with our other computer equipment. This donation will be utilized frequently for various muskie management projects, from tagging fingerlings to be stocked to creating capture histories for adult fish.

It is great to have this excellent working relationship with an organization that does so much to support the resource. Thank you very much.

Sincerely,

Andrew Thompson
Acting Area Fisheries Supervisor, Bemidji

C: Chris Thury, Bemidji-Cass Lake Chapter President
Marc Bacigalupi, NW Regional Fisheries Manager
